You don't often get email from jamesey125@hotmail.com. [Learn why this is important](#)

I am writing to express my deep concern regarding the proposed construction of wind turbines and BESS near my home in Mount Fox. Our community, including my family, values the natural bushland and wildlife that make this area special.

Having chosen this location for its serene environment, we are worried that the installation of wind turbines and BESS will significantly impact our way of life. The visual and noise disturbances caused by these structures pose a threat to the tranquility we cherish and could potentially disrupt the learning environment for our children attending school in the area.

I kindly request that you consider the profound impact this project will have on the local community's well-being and the natural ecosystem. Preserving the unique qualities of our region is crucial for the continued enjoyment of residents and the sustainability of the environment.

Thank you for your attention to this matter, and I hope we can engage in a constructive dialogue to address these concerns as we are really worried about our children's safety and future.

Sincerely, Lennon James, 1371 Mount Fox Road.
