Subject: Concerns Regarding Proposed Wind Farm Project

To Whom It May Concern.

I hope this email finds you well.

I am writing to express my deep concerns regarding the proposed wind farm project in the Mt Fox area. While I understand the importance of renewable energy initiatives, I believe that this particular project raises significant environmental and social issues that must be carefully considered.

It is evident that the primary beneficiaries of this wind farm project would be commercial entities, with little tangible benefit accruing to the local community. The commercial and business interests involved seem to be prioritized over the well-being of residents and the environment.

Furthermore, the proposed location of the wind farm poses a significant threat to our local wildlife. The area is home to a myriad of threatened species, and the construction and operation of the wind farm could have devastating consequences for their habitats and populations. I am particularly concerned about the potential destruction of koala habitat, which is already under immense pressure due to urbanization and deforestation.

I urge you to reconsider the approval of the proposed wind farm project. It is essential to prioritise the protection of our environment and the welfare of our communities over short-term commercial interests.

Sincerely,
Paola Nunez
